

INFANT NUTRITION
SENSITIVE CONSUMERS
NEED THE SAFEST SOLUTIONS

INFANT NUTRITION: SAFETY COMES FIRST

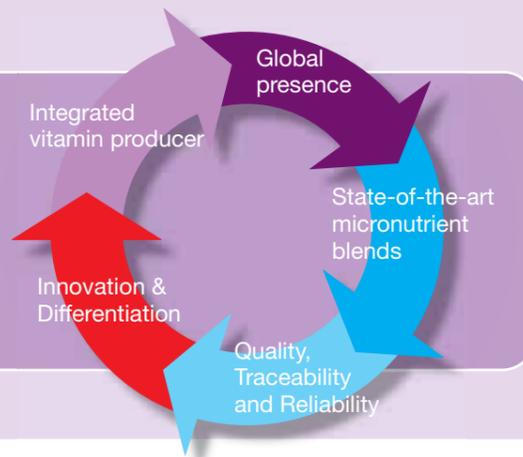

DSM Nutritional Products ensure a good start in life right from the beginning. We all know that breast feeding is the best source of nutrition for infants, but when it's not a viable option, DSM provides the best alternative.

For infant nutrition, safety is essential. Only the safest ingredients are worth considering. You need to ensure that vitamins and nutritional ingredients used in your products are the best in the market to avoid any risk. We supply the very safest and most effective ingredients available for infant nutrition products.

Awareness of food quality and safety is increasing. Consumers require the highest possible product quality to be sure that their children receive all the nutrients they need.

Building a healthy future starts with using the core elements of DSM Nutritional Products and the reassurance of knowing that they are integrated into one perfect solution.

WE ARE ABLE TO PROVIDE YOU WITH THE SAFEST INFANT NUTRITION INGREDIENTS BASED UPON THESE CORE ELEMENTS:

WE GUARANTEE PEACE OF MIND FOR OUR CUSTOMERS AND CONSUMERS

INTEGRATED VITAMIN PRODUCER

YOU CAN COUNT ON US TO DELIVER:

- Micronutrient Blends
- Vitamin A
- Vitamin D3
- Vitamin E
- Vitamin K
- Vitamin B1
- Vitamin B2
- β-carotene
- Niacin
- Pantothenic acid
- Vitamin B6
- Vitamin B12
- Folic acid
- Biotin
- QUALI-C™ (Vitamin C)
- ROPUFA® (DHA)
- Nucleotides blends
- Lutein
- OPTISHARP™ (Zeaxanthin)
- redivivo™ (Lycopene)

FOR FINAL INFANT FOOD PRODUCTS LIKE:

- Infant formulae
- Specialty formulae
- Follow-on / growing-up formula
- Cereals for infants
- Cereal-based products
- Baby food in jars
- Fruit and vegetable juices
- Biscuits
- Baby meals

As the world's only integrated vitamin producer, we are able to not only deliver individual ingredients but also carefully formulated premixes, depending on your exact needs.

Our nutritional ingredients and premixes are manufactured to the very highest safety and quality standards, using the latest production techniques. Being an integrated vitamin producer increases our ability to ensure full traceability along an important part of the food production chain.

With a presence in over 100 countries, DSM Nutritional Products has more than 40 sales offices and 11 global scale manufacturing sites. For human nutrition and health alone, DSM has 13 dedicated premix plants, distributed across 8 locations all over the world, producing tailor-made formulations for our customers.

We are right by you, with a promise of safety that extends all over the world.

GLOBAL PRESENCE

OUR WORLDWIDE INTEGRATED PRODUCTION ENSURES FULL TRACEABILITY

STATE-OF-THE-ART MICRONUTRIENTS BLENDS

DSM Nutritional Products leads the world in the manufacture and supply of micronutrient blends. Elementary to safe nutrition is achieving precisely the right balance of the right nutrients.

With our extensive experience of nutritional product marketing and applications, we are ideally placed to support your specific needs. We offer the most complete portfolio of high quality vitamins and nutritional ingredients, with the highest safety standards - as well

as tailor-made blend formulations made to your requirements, and those of consumers. For sensitive segments such as infant nutrition, we guarantee strict cross-contamination control.

Our production capabilities are supported by a network of state-of-the-art analytical laboratories. Fully compliant documentation, policies and procedures complete our offering, providing you with accurate and up-to-date information on all our products and services.

Our global network of blend facilities ensures that we can always deliver the same high quality standards all over the world. We work closely with you, providing manufacturing expertise, detailed product know-how and reliable supply.

YOU CAN RELY ON DSM MICRONUTRIENT BLENDS FOR:

- Dedicated focus on infant nutrition
- Solutions supported by expertise and scientific know-how
- Full traceability
- Quality assurance with integrated and validated systems
- Full support package (formulation, application, scientific)
- In-house analysis of all active ingredients and blends (chemical and microbiological)
- Strict cross-contamination control
- Full compliance with regulatory requirements
- Safe and reliable products: raw materials used have the highest quality level (FCC, USP, Kosher, Halal, Allergen free)
- Manufacturing sites certified according to ISO 9001:2000 & 14001. We manufacture in accordance with GMP rules and HACCP operating guidelines.
- Analysis of customer's end product

WHEN IT COMES TO BLENDING, WE OFFER YOU THE SAFEST SOLUTIONS

QUALITY, TRACEABILITY AND RELIABILITY

Ensuring the highest levels of safety, means setting industry standards.

DSM's aim is not only to provide benchmarks for the industry, but to reassure our customers with quality that brings peace of mind.

We apply globally-recognized Good Manufacturing Practice to our production operation worldwide. Which means every part of the process – from sourcing through to production, quality assurance and storage to delivery – is managed to enable the highest levels of process safety and product quality. In addition to this, all our processes are designed to anticipate customer requirements and market trends.

As well as product specifications, DSM provides clear statements concerning, for example, GMO ingredients, BSE/TSE, residual solvents limits and the absence of allergenic potentials. In many cases, Kosher and Halal certificates can be issued by reputable international organizations.

Understanding and commitment are fundamental. With thorough understanding of your needs, and those of consumers, all our products are developed with Quality, Traceability and Reliability in mind. Our commitment is to meet your requirements today and in the future.

QUALITY

At DSM Nutritional Products, we understand the increasing importance of providing quality in infant nutrition ingredients. We offer consistent, premium quality in all our products, guaranteed by GMP, HACCP, CEP and ISO quality standards. Our superior products and service standards help you to maintain brand value and customer loyalty.

As a DSM customer, you are assured of the best quality of ingredients.

TRACEABILITY

We also recognize just how important traceability is to infant nutrition producers. Our products meet both your regulatory and consumer requirements. DSM's proven production processes, advanced control systems and reliable suppliers ensure maximum traceability.

As a DSM customer, you know exactly where your ingredients come from.

RELIABILITY

In addition to superior quality, our infant nutrition customers require the highest levels of reliability. With over 70 years of experience, micronutrient blends plants in all regions of the world and exceptional control in our supply chain, we can ensure full reliability.

As a DSM customer, you can depend on us for outstanding service.

QUALITY, TRACEABILITY AND RELIABILITY ARE OUR KEY ELEMENTS TO PROVIDE YOU WITH PEACE OF MIND

INNOVATION & DIFFERENTIATION

GROWTH & DEVELOPMENT

Optimal nutrition provides the foundation for good health. During the first year of a baby's life, a balanced nutrition is crucial as the baby's diet must support their rapid growth & development. Vitamins and minerals are essential in the metabolism of energy nutrients. Nucleotides also play major roles in almost all physiological processes, in particular in cells/organs which replicate/proliferate rapidly, such as in growing tissue, in development and in repair.

BRAIN DEVELOPMENT

Adequate fortification of infant formula and infant foods with all known essential micronutrients, including vitamins, minerals, trace elements and long-chain polyunsaturated fatty acids, is essential to support neurological development. Micronutrients which play an important role in brain performance include B-Complex Vitamins, Vitamin C, Iron and Zinc. DHA (Docosahexaenoic Acid), AA (Arachidonic Acid), Taurine and Choline should also be considered for inclusion.

IMMUNITY

Nutrition performs a pivotal role in maintaining immunity and the body's ability to fight infections. A range of micronutrients such as vitamins, carotenoids, nucleotides, fatty acids and minerals are very important in optimizing the functioning of the immune response against challenges.

DSM OFFERS INGREDIENTS THAT PROVIDE VARIOUS BENEFITS TO YOUR SENSITIVE CONSUMERS

At the forefront of science, DSM Nutritional Products can help you stay ahead of scientific and market developments in infant nutrition.

We identify consumers' concerns, understand their needs and translate these into innovative marketing solutions.

HEALTHY BONES

Bone formation is regulated by specialized cells. In childhood, formation exceeds degradation leading to a constantly increasing bone mineral density. Good nutrition is vital during early childhood to build up and maintain adequate bone mass. Main nutrients for healthy bones are Calcium, Vitamins D, B6, K and C.

EYE HEALTH

Carotenoids are present in human milk. Beyond their role as pro-vitamin A and protectors of the retina, carotenoids have many other biological functions. Lutein and Zeaxanthin are the only carotenoids protecting the retina from oxidative damage and are important for the maintenance of ophthalmic health.

TOP 3 CONCERNS FOR CHILDREN (UNDER 5 YEARS OLD)

EUROPE:

1. Mental development
2. Protection against disease in later life (heart disease, high blood pressure, diabetes)
3. Growth and physical development (height, bones, muscles)

NORTH AMERICA:

1. Balanced diet
2. Mental development
3. Resistance to disease (colds, coughs)

ASIA PACIFIC:

1. Resistance to disease (colds, coughs)
2. Growth and physical development (height, bones, muscles)
3. Balanced diet

LATIN AMERICA:

1. Growth and physical development (height, bones, muscles)
2. Resistance to disease (colds, coughs)
3. Dental cavities
